

## SAT LUBE 250

**SAT LUBE 250** is a glycol-based lubricant for general application. It is a cost-effective way to significantly reduce torque and drag and increase rates of penetration in all shales and gumbos. It is particularly effective in horizontal drilling and sliding applications. **LUBE 250** forms a hydrodynamic barrier between the drill pipe and the sidewall, coating shales and cuttings and decreases disintegration. It is dispersible in all types of water-based fluids, it is not affected by contaminants and will not interfere with rheological properties.

### APPLICATIONS

Add to drilling fluids at 2 to 5% for most applications.  
Use more as required for severe torque and drag.

### PHYSICAL PROPERTIES

Specific Gravity	1.06-1.2 @ 25/25C PMCC
Flash Point	221°C
Solubility	Water Dispersible
Appearance	Dark Amber to Black
Physical form	Viscous liquid, Mild odor

### ADVANTAGES

Reduces torque and drag  
Reduces pick-up and slack weight  
Will not grease out  
Inhibits shale  
Non-toxic

### HANDLING

Non Hazardous  
Refer to MSDS for handling information

### PACKAGING

Available in bulk, 275 gallon totes, and 55 gallon drums
